Workshop Series 2009

Workshop 11 Project Management by Mr. Stuart Auckland

The forthcoming Project Management Workshop will provide participants with a practical guide to managing the various phases within a project life cycle, from project initiation through to project closure. Using practical examples relating to the health sector participants will work through key components of the project management cycle including; planning and scoping, governance, risk assessment and management, issues management, resourcing and sequencing, stakeholder management, quality assurance, reporting, monitoring and evaluation and project closure.

The workshop will have application to those people involved with developing research projects and/or managing activities that create new or improved services or products.
